

Spring 2026
IS 365

Business Processes and
Information Systems
Integration

Dr. Smiley

Business Problem

You're a summer intern at Ivory Dental. The clinic wants to cut patient wait times, streamline scheduling, and explore how AI can help.

Let's help them get started by answering a few questions

...

Question 1:

Dr. Smiley wants to improve patient check-in. Which approach best represents Business Process Management?

- A. Hire more front desk staff
- B. Notify patients to arrive earlier
- ☒ C. Optimize the check-in workflow
- D. Automate all the forms

Question 2:

Which task is NOT a good fit for Generative AI?

- A. Predicting which patients will cancel next week
- B. Drafting a polite email to a patient
- C. Summarizing patient reviews on Google
- D. Writing a social media post for the practice

Solution

Within a couple of months, you create Ivory AI – an agentic AI system that monitors patient bookings, predicts cancellations, auto-fills insurance claims, and emails the staff with recommendations.

Dr. Smiley offers you a full-time position as Director of IT. You politely decline, launch an AI startup, and sell it to Microsoft for \$40M three years later.

About Me

Hobbies

Whitewater Rafting
Motorcycling
Ham Radio

Working on my first book

Dr. Rajul Misra

Current: Founder of a Stealth Startup in Agentic AI

Companies: Microsoft, United Technologies, WPP, NPD, various startups

Titles: Chief Marketing Officer, Chief Data Scientist, Principal Product Manager, Senior Research Engineer

Interests: Marketing, Data Science, Econometric Analysis, Agentic AI

Learning Outcomes of IS 365

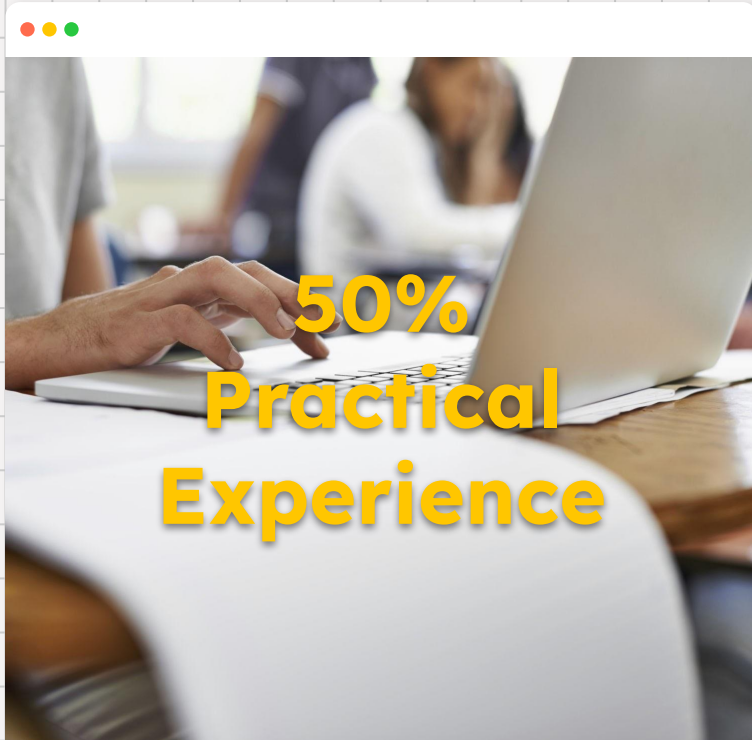

Practical ability to:

- Conceptualize, design, and implement automated business workflows using AI.

Solid foundation in:

- Business process management
- Process re-engineering and automation
- Generative / Agentic AI

Teaching Methods

Text Books

done

Both books can be downloaded from the “Reference Materials” module in WebCampus.

**Fundamentals of
Business Process
Management (Marlon
Dumas, et. al; 2013)**

**Agentic Artificial
Intelligence: Harnessing
AI Agents to Reinvent
Business, Work, and
Life (Pascal Bornet, et.
al.; 2025)**

Class Expectations

Do's

- Attend and participate in class. There is no wrong question!
- Collaborate with your fellow students. That's how we learn and grow!
- Leverage online resources. Yes, that includes ChatGPT or your favorite AI platform!

↳ Interesting

Don'ts

- Don't plagiarize. Understand the difference between collaboration and copying!
- Don't miss classes. Content builds up and quizzes / assignments are going to be directly based on what's taught in class!

Assessments

Start thinking about your project teams. **Team members are due by Jan 28.**

→ idk anyone...

Note

- **Quizzes:** Online, multiple-choice questions. Are timed and given during class. Make sure to bring your computer to class, especially on days you'll have a quiz.
- **Assignments:** Online, requiring open-ended responses. Given at the end of class and typically due a week later.
- **Project:** Group project focusing on problem definition, business process mapping, and AI-powered automation.

Only one make-up quiz allowed & only for a documented reason.

Class participation & peer feedback is important.

Schedule

Time

WEEKS

1-4

WEEKS

5-6

WEEKS

7-12

WEEKS

13-16

Topics

Theory of Business Process Management; BPMN 2.0

Project topic presentations

Automating business processes using AI; hands-on workshop

Project final presentations and discussions

Assessments

- Quiz 1, 2
- Assignment 1, 2

- Project Task 1

- Quiz 3
- Assignment 3

- Project Task 2

Group Project

Date	Deliverable	Description
DUE Jan 28	Survey Response: Team Members	Names of team members (4-5) and a fun name for the team.
DUE Mar 9	Task 1 (~10 slides; PDF): Business Problem & Process Mapping	Description of business problem & process mapping.
DUE May 11	Task 2 (~20 slides; PDF): Final Report / Presentation	Final report with problem, AI-driven automation, & business impact.

Contact Me

Best way to contact me is before/after class or by email. If you are sending an email, please be specific in your request.

I can also accommodate an online meeting, subject to my availability.
